

HomeBrace

Your home at your hands

MyStick

Joystick for the Mouth

MyControl + MyStick

All common PCs and consoles can be operated with our special joysticks.

There are two possibilities of operation depending on the handicap. Both joysticks must be connected to the USB port of the console.

For the majority of our customers in Germany, the health insurance fund has assumed the costs for this special control. Contact us and we will be happy to advise you on the necessary steps and explain the procedure to you. We will be happy to advise you competently and without obligation. Please get in contact with us.
